Signage

Special features

Versatile
Cost effective

Keep in the original packaging, away from moisture and fingerprints. Jumbo rolls should remain on their original pallets. Allow paper to acclimate in the print room before use. For optimal results, maintain 40-50% humidity and 20-26°C temperature. Under recommended storage conditions, shelf life is 1 (one) year.

The information in this leaflet reflects our current knowledge and is not legally binding. Due to varied substrates and working conditions, this sheet offers non-binding advice. Prior to printing, conduct tests to confirm suitability for the intended purpose.
