ONYX PosterShop

Version X10

ONYX® PosterShop® RIP software delivers efficient print production and output consistency

ONYX PosterShop RIP software provides the control and simplicity needed to unify the print production process and achieve consistent output quality, helping print providers reduce overhead costs. Print operators will find it easy to manage more than one device in a production environment while automating routine tasks that will reduce errors and create greater overall efficiency. With ONYX PosterShop, print providers will gain an advantage over the competition by utilizing proven RIP software that delivers the productivity, power and simplicity to help get to sellable prints faster.

Productivity

ONYX PosterShop enables the ability to automate print production and reduce the need for costly manual intervention to do repetitive tasks. Maintaining a unified workflow across different printers allows shops to get more done in less time and reduce overhead costs.
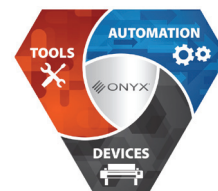

Power

ONYX PosterShop delivers the power to control print production workflow and maintain consistent output quality which helps print providers gain a competitive advantage while meeting tight customer deadlines. Versatile tools also support multiple print applications and help shops get to sellable prints faster.

Simplicity

ONYX PosterShop simplifies the building of unattended workflows for automation of routine tasks, making print production more efficient. ONYX PosterShop also helps shops save time and reduce waste on last minute changes with intuitive job control and the ability to maintain print accuracy.

> "No other RIP I have compared to X10 offers the high level of automation I need in my shop to meet my deadlines."
>
> *- Tyler Nylund, High Tech Signs*

Driving Smarter Workflows with fewer steps to production

- Award winning 32-Bit ONYX Color Engine optimized for wide-format inkjet technologies
- Includes a comprehensive set of small to wide-format drivers with thousands of standard color profiles
- Manual spot color replacement
- Automated spot color replacement with included PANTONE Plus®, RAL and HKS® spot color matching
- Smart 16-Bit™ Processing
- Exclusive ONYX PosterColor® rendering
- Maximum workflow efficiency with Quick Sets and Unlimited Hot Folders
- Multi-Page PDF splitting and processing
- Virtual printing from Macintosh® and Windows® workstations
- Automated and unattended Print and Print-and-Cut workflows
- Complete printer operator feature set for automated nesting, tiling, color correction, job management and archiving
- White and specialty ink tools
- Step-and-Repeater module for fast creation of textile patterns
- RIP-and-Print on the fly wile processing other files
- Official G7® Support Tool

Operating System

- Microsoft® Windows® 7 Professional operating system (SP1 or Higher)

CPU

- Intel® Core™ 2 Duo Processor or equivalent

Ram

- 2 GB/processing core

Hard Drive

- 1 dedicated system drive
- 1 dedicated drive for ONYX RIP Products (250+ GB free space)

Network Connectivity

- Gigabit

Additional Hardware

- Dedicated USB port for security key
- DVD-ROM drive

ONYX PosterShop is wide format RIP software that enables shops to unify their print production process on more than one device and provides the tools to maintain consistent output quality. Print service providers will be able prepare jobs for print quickly and find it easy to automate repetitive tasks resulting in sellable prints faster.
